

**Eloquent and Grateful**

	Musical Biography: Read a biography of a famous musician or composer. You can pick a figure like Wolfgang Amadeus Mozart, Aretha Franklin, or Jimi Hendrix. Gain insights into their life, career, and the impact they had on music.
	Watch a classic movie that features memorable music, like 'The Sound of Music', 'Star Wars' or 'Amadeus'. Pay attention to how music enhances the cinematic experience, and afterward, research the composer or the soundtrack's significance.

**Attentive and Compassionate**

	Explore a music genre: choose a music genre you are not very familiar with, such as jazz, reggae or classical. Listen to a few key tracks and research the history and characteristics of that genre. Try to identify the instruments commonly used and its prominent artists.
	Explore Music Technology: Learn to use a digital audio workstation (BandLab – free) or GarageBand. Create a short electronic composition and share it with your friends or family.

**Wise & Curious and Faith-filled & Prophetic**

	Song writing challenge: create your own song. Write lyrics, compose music and perform it. You can use music software (such as BandLab, GarageBand etc.) or just pen and paper. Share your creation with friends or family.
	Go to a live music performance. It could be a concert, a local gig, or an event in school. Experience the magic of live music in person.
